E.G.S.PILLAY ARTS & SCIENCE COLLEGE (AUTONOMOUS)
NAGAPATTINAM – 611 002. TAMIL NADU
(Accredited by NAAC With "A" Grade)
(MBA – Approved by AICTE, New Delhi)
(Affiliated to Bharathidasan University, Tiruchirappalli – 24)

Department of Fashion Technology
And
Costume Designing

Regulation for the UG Programmes
Choice Based Credit System (CBCS)
Learning Outcomes Based Curriculum Framework (LOCF)

(For the Candidate Admitted from the Academic Year 2025 - 2026 onwards)

EDAYATHANGUDY G.S. PILLAY ARTS & SCIENCE COLLEGE
(Autonomous)
NAGAPATTINAM

DEPARTMENT OF FASHION TECHNOLOGY & COSTUME DESIGNING
CURRICULUM FOR THE ACADEMIC YEAR

(2025-2026)

PROGRAMME EDUCATIONAL OBJECTIVES (PEOs)

Program Educational Objectives (PEOs)

PEO1 To familiarize students with fundamental knowledge in creating

core competency in fashion design

PEO2 Competent in industry, academic or research in the field of garment and fashion technology

PEO3 Flair in Garment technology, Merchandising and Fashion designing & apparel

manufacturing

PEO4 To enable students to develop the ability of managing start-ups.

PEO5 Skilled in fashion portfolio presentation, dyeing industry, basic draping and garment Industry.

PEO6 Possess skills of Merchandiser, Fabric inspector, Quality controller

PEO7 Develop as a costume designer, CAD designer

PEO8 Demonstrate creativity and deploy creative ideas in apparel, fashion and Textile Industry.

PEO9 The student can work as a freelancer and can work as fashion merchandiser

PEO10 Equip Human Values, Ethics and Principles and have a concern over the society

Program Outcomes (POs)

On successful completion of the B.Sc. Costume Design and Fashion program, the students are expected to

PO1 Design, Draft and construct children, women and men' garments and develop Fashion portfolios.

PO2 Apply the terminologies and concepts of Fashion design their respective field

PO3 Develop products with quality for market by using appropriate merchandising and marketing strategies

PO4 Plan and execute order in a garment manufacturing unit covering all stages - fiber, yarn, fabric and garment manufacture

PO5 The student become thorough and skilled in the area of design development by using design software

PO6 Enhance fabric designs with dyeing, printing and surface ornamentation techniques

PROGRAMME SPECIFIC OUTCOMES (PSOs)

On completion of B. Sc. (Fashion Technology & Costume Designing) programme, graduates will

be able to

PSO_01: Design and develop apparel products to meet the end user desire by applying basic concepts in design and illustration.

PSO_02: Select the right materials and accessories for constructing

the garments with respect to changing global fashion.

PSO_03: Create and present various product design to attain entry

level position in fashion industry.

PSO_04: The student will learn about fashion illustration PSO4 The student will learn about digital designing using software

PSO_05: Understand the concepts of Environmental consciousness, communication skill, holistic and value based education, and lifelong learning ability.

16	V	Gender Studies	1
17		Extension Activities	1
TOTAL			43

Internship for 15 DAYS during the summer vacation in FIFTH Semester in Textile Designing, Processing & Garment constructing units, Prepare & submit the report.

* for those who studied Tamil up to 10th +2 (Regular Stream)
+ Syllabus for other Languages should be on par with Tamil at degree level
those who studied Tamil up to 10th +2 but opt for other languages in degree level under Part I should study special Tamil in Part IV
** Extension Activities shall be outside instruction hours

Note:

	Internal Marks	External Marks
1. Theory	25	75
2. Practical	50	50

FOR THEORY

The passing minimum for CIA shall be 40% out of 25 marks [i.e. 10 marks]
The passing minimum for University Examinations shall be 40% out of 75 marks [i.e. 30 marks]

FOR PRACTICAL

The passing minimum for CIA shall be 50% out of 50 marks [i.e. 25 marks]
The passing minimum for University Examinations shall be 50% out of 50 marks.

First Semester

Course code		INTRODUCTION OF FASHION	L	T	P	C
Core		Paper I	4	-	-	4
Pre-requisite		Students required having basic creativity and knack towards designing.	Syllabus Version		2025-2030	

Course Objectives:

The main objectives of this course are to:

1. To teach the basics of design elements and principles.
2. To fulfill the bridge between industry and academic.
3. To make the budding designer to work for the world of fashion in order to fulfill the world class education in fashion design sector.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

CO1	Remember the basics of Design Concepts	K1
CO2	Understand the principles of design.	K2
CO3	Understand the importance color and its application	K2
CO4	Apply the concepts of unusual figures in dress making	K3
CO5	Analyze the various color and design concepts	K4

K1-Remember; **K2**-Understand; **K3**-Apply; **K4**-Analyze; **K5**-Evaluate; **K6**–Create

Unit:1	Fashion Concept	6 hours

Meaning of Fashion, Origin of Fashion, Meaning of Fashion Designing, Classification of Fashion, Influence of Fashion, Fashion Illustration and Fashion Cycle. Terms Related to the Fashion Industry-Fashion, Style, Fad, Classic, Collection, Chic, Mannequin, Fashion Show, Trend, and Haute Couture.

Unit:2	Design and Elements of Design	6 hours

Design– Definition, Principles of Design–Balance, Rhythm, Harmony, Emphasis and Proportion. Types- Structural and Decorative Design, Requirements of a Good Structural and Decorative Design. Application of Structural and Decorative Design in the Dress, Elements of Design- Line, Shape or Form, Color, Size and Texture.

Unit:3	Colors	6 hours

Colors - Importance. Dimensions of colour, Colour Theory – Prang colour chart. Colour Harmonies-Monochromatic, Analogous, Complimentary-Double Complimentary Split Complimentary, Traid Colours, Cool Colours and Warm Colours and Moods of Colour.

Unit:4	Styling For Different Body Types	6 hours

Silhouettes and figure types-pear figure, hourglass figure, rectangular figure, wedge figure, overall roundness figure. Choosing the best dress for the figure types. Factors influencing design application for different age group, occasions and seasons.

Unit:5	Career in Fashion	6 hours

Scope of Fashion business, choosing a career in Fashion, Career in Manufacturing, Desingning, Career in Retailing, Residential Buying office careers, Career in Fashion service organizations, Freelancing.

	Total Lecture hours	30 hours

Text Book(s)	
1	Colour Harmony– A Guide To Creative Colour Combinations, BrideM. Whelan, Rockport Publishers, USA, 1997.
2	Elements of Fashion and Apparel Design, Sumathi.G.J, New Age International (P)Ltd, NewDelhi, 2002.

Course Designed By: Ms. M. Abisha	

Course code		BASICS OF TEXTILE MANUFACTURING	L	T	P	C
Allied course – I		Paper -I	5	-	-	4
Pre-requisite		Basic knowledge of Textile science	Syllabus Version		2025-2030	

Course Objectives:

The main objectives of this course are to:

1. Learn how fiber is spun to yarn and made into fabrics by understanding each process
2. Learn the basics of knitting and weaving
3. New fibers innovated is also discussed

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

CO1	Remember about the basic types of fibre	K1
CO2	Understand the manufacturing process of fibres	K2
CO3	Understand the different varieties of yarn and its formation	K2
CO4	Understand the basics of fabric formation	K3
CO5	Analyze the importance of fibre selection in designing	K4

K1-Remember; **K2**-Understand; **K3**-Apply; **K4**-Analyze; **K5**-Evaluate; **K6**–Create

Unit:1	Textile fibres	6 hours

Introduction to textiles, Classification of textile fibres, source and properties - Natural and manmade; Primary and secondary properties of textile fibres; Identification of textile fibres; Fibre manufacturing concepts - Natural, regenerated and synthetic; Elastomeric fibres and its application, High performance fibres - types, properties

Unit:2	Yarn Formation	6 hours

Definition, yarn count, twist - definition, direction, amount; Classification - staple, filament; Spinning Process - chemical and mechanical; Types and characteristics of yarn - simple, ply, cabled, doubled, novelty yarn; Spun yarn manufacturing process

Unit:3	Weaving	6 hours

Introduction to weaving; Preparatory processes - flow chart, objective, Loom - types, passage of material, Motion of loom - Primary, secondary and auxiliary; Advancements in loom; Geometrical properties of woven fabric - Grain, fabric count, balance, fabric width, fabric weight, selvages

Unit:4	Knitting	6 hours

Introduction to Knitting; Knitting terms and functional elements; Types of knitting: warp knitting and weft knitting; Stitches in weft knitting and its effects on fabric - knit, tuck, miss, purl; Machineries used for weft knitting and warp knitting

Unit:5	Nonwoven	6 hours

Nonwoven - introduction, fibres used, classification, fabrication techniques, characteristics and applications

	Total hours	30 hours

Course Designed By: Ms.R.Keerthika	

Course code		FASHION SKETCHING & ILLUSTRATION	L	T	P	C
Core practical-I		Practical l	-	-	6	4
Pre-requisite		Basic drawing skill	Syllabus /version		2025-2030	

Course Objectives:

The main objectives of this course are to:

1. Learn the basics of object drawing and shading.
2. Learn basic head theories and draw human figures at different angles.
3. Learn hair style and accessories illustration.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

CO1	Remember about the basics of Fashion illustration	K1
CO2	Understand the elements of sketching	K2
CO3	Understand the art of creating textures and shading	K2
CO4	Apply head theories while drawing fashion figures	K3
CO5	Apply hairstyling, cosmetics and accessories to fashion figures	K3

K1-Remember; **K2**-Understand; **K3**-Apply; **K4**-Analyze; **K5**-Evaluate; **K6**–Create

Experiments		30 hours

LIST OF EXPERIMENTS

Unit–I Introduction to Fashion Illustration

1. Free Hand Drawing
2. Basics of Shading.
3. Pencil grading and smudging techniques.
4. Stick figures in different poses.

Unit-II Fashion Figure Drawing

1. 8 Head theory
2. 10 Head Theory
3. 12 Head Theory.

Unit–III Facial Feature

1. Drawing eyes, nose, ears, lips, face and hairstyles.
2. Sketching of different angles of hands.

Unit-IV Draw& Shade The Following With SuitableShape& Size

1. Different types of Collars.
2. Different types of Sleeves.
3. Different types of Necklines.
4. Different types of Skirts.
5. Party wear (Men and Women).
6. Casual wear (Men and Women).
7. Formal wear (Men and Women).

Unit–V Sketching Of Fashion Accessories and Design

1. Different types of Accessories.
2. Different types of Ornaments- Traditional, Modern and Antique.
3. Loge design create for own boutique.

	Total Lecture hours	30 hours

Course Designed By : Ms.M.Abisha	

Second Semester

Course code		FASHION FORECASTING & PHYCOLOGY	L	T	P	C
Core		Paper II	5	-	-	5
Pre- requisite		Basic knowledge in fashion concept and various fashion trends & Phycology	Syllabus Version		2025-2030	

Course Objectives:

1. To understand the importance of psychology in fashion
2. To identify the dress according to season
3. To impart the knowledge about trend analysis
4. To facilitate students to understand about the color, material forecasting
5. Acquire better knowledge of predict the consumer's buying behavior and psychology

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

CO1	Remember the basics of Fashion Concepts	K1
CO2	Understand fashion styling, role of fashion and forecasting.	K2
CO3	Analyze the fashion trend with the help of fashion forecasting tools	K3
CO4	Survey and predict the right color and material for any season	K4
CO5	Articulate the concepts, mood and develop color palettes	K6

K1-Remember; **K2**-Understand; **K3**-Apply; **K4**-Analyze; **K5**-Evaluate; **K6**–Create

Unit:1	Forecasting	6 hours

Fashion forecasting – definition, types: long term and short term, the direction of fashion change, types of forecasting methods: qualitative and quantitative, various factors influencing fashion change – social, cultural, military, royal, celebrity, professional, Need for fashion forecasting, The role of fashion forecasters Steps in fashion forecasting process

Unit:2	Fashion Trend	6 hours

Fashion trend – definition, Trend chasers, visualization and forecasting, fashion trend forecasting – past, present and future, social medias and its influence for fashion trend forecasting, trend forecasting schedule, types of trend – fad , classic; trend influencers

Unit:3	Fashion Psychology	6 hours

Factors influencing Fashion Changes-Psychological Needs of Fashion, Social Psychology of Fashion, Technological, Economical, Political, Legal and Seasonal Influence. Role of Costume as a Status Symbol, Personality and Dress, Repetition of Fashion.

Unit:4	Buying behaviour and Psychology	6 hours

Consumer psychology and buying behaviour: Mind to wear, get right clothing, occasional clothing, self-confidence with dressing, Reason to dress the way- psychological process, fashion psychology today, research in fashion psychology

Unit:5	Psychology of color in clothing	6 hours

Psychological view of color categories, warm and cool colors, characteristics and effects of color, color blindness, metamerism, color and impression, color perceptions, mood and emotions, color and desire, harmony of colors, color combinations.

	Total Lecture hours:	30 hours

Text Book(s)	
1.	Carolyn Mair, The Psychology of Fashion (The Psychology of Everything), Routledge; 1 edition, 2018
2.	Sharron J. Lennon, Kim K. P. Johnson, Nancy A. Rudd**,** Social Psychology of Dress, Fairchild Books, 1st, 2017
3.	Gwyneth Holland, Rae Jones, Fashion Trend Forecasting, Laurence King Publishing, 2017
Expected Reference Books	
1.	Mike Easey, Fashion Marketing, Wiley- Blackwell Publishing, 2011
2.	Professor Karen J. Pine, Mind What You Wear: The Psychology of Fashion, Kindle edition, 2014
Course Designed By:Ms.G.Narmatha	

Course code		PATTERN MAKING AND GRADING	L	T	P	C
Core practical		Practical II	-	-	4	4
Pre-requisite		Basic mathematical calculation and shapes for pattern	Syllabus Version		2025-2030	

Course Objectives:

The main objectives of this course are to:

1. Draft the pattern for given men's, women's and children's style sample.
2. Students will grade the pattern of required size.
3. Student's will learn the development of fashion style patterns from basic patterns.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

CO1	Remember the basic drafting methods	K1
CO2	Understand the pattern development procedures	K2
CO3	Understand pattern grading methods	K4
CO4	Apply drafting methods in creating patterns	K3
CO5	Create the pattern with required style and measurement and grade them	K6

K1-Remember; **K2**-Understand; **K3**-Apply; **K4**-Analyze; **K5**-Evaluate; **K6**–Create

	Pattern Drafting	**10 hours**

Sleeve

1. Plain
2. Puff sleeve at top and bottom
3. Bell Sleeve

Collar

1. Shirt
2. Peter pan
3. Stand

	Pattern Drafting – Children	**10 hours**

II. Draft the pattern for given kids style / sample and also grade them according to the specification.

1. Bib, panty and Jabla
2. Summer Frock
3. A-Line Frock

	Pattern Drafting – Women & Men	**10 hours**

III. Draft the pattern for given women's style & men's style/ sample and also grade them according to the specification.

Women

1. Saree Petticoat
2. Blouse

Men

1. Full Sleeve Shirt
2. Pleated Trouser

	Total Lecture hours	**30 hours**

Course code		SEWING TECHNIQUES	L	T	P	C
Allied practical- I		Practical II	-	-	4	2
Pre-requisite		Basic idea about sewing machine, and construction	Syllabus Version		2025-2030	

Course Objectives:

The main objectives of this course are to:

1. Students will learn threading process in different sewing machines
2. They will do sample preparations, various collars, pockets, sleeves, plackets, etc.
3. They will learn care and maintenance of sewing machine

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

CO1	Remember the basic parts and functions of sewing machine	K1
CO2	Remember the safety measures and sewing machine care	K1
CO3	Understand the threading techniques	K2
CO4	Understand the seams and seam finishing techniques	K2
CO5	Create the component samples suitable for garment design	K6

K1-Remember; **K2**-Understand; **K3**-Apply; **K4**-Analyze; **K5**-Evaluate; **K6**–Create

	Threading Practice	**6 hours**

1.Threading practice for SNLS machine

	Sample Preparations	**6 hours**

2. Sample preparations for SNLS machine, Over lock machine, machine
3. reparation of samples for seam (any5) –Plain, Top stitched, Flat fell, Piped seam
4. Preparation of samples for seam finishes (any 3) – Overcast, Hem, Edge stitched, bound

	Sample Preparations	**6 hours**

5. Preparation of samples for fullness – darts, tucks (any 2) – pin, cross, group tucking with scalloped effect, pleats (any 2) – knife, box, kick, gathering by machine, elastic. Ruffles –single, double
6. Preparation of samples for facing and binding – bias facing, shaped facing, binding
7. Preparation of samples for plackets – continuous, bound, faced and zipper plackets, tailored placket, button and buttonhole, press button, hook and eye

	Sample Preparations	**6 hours**

8. Preparation of samples for sleeves – plain sleeve, puff sleeve, raglon
9. Preparation of samples with yoke–simple yoke, yoke supporting fullness
10. Preparation of samples for collar–peter pan collar, shirt collar
11. Preparation of samples for pocket – patch pocket

	Care And Maintenance of Sewing Machine	**6 hour**

12. Safety practices while working on sewing machine. Care and maintenance of sewing machine.

	Total Lecture hours	**30 hours**

Text Book(s)

1	Practical Clothing Construction, Part I & II,Mary Mathews, CosmicPress, Chennai, 1986.
2	Zarapker System of Cutting, Zarapkar K. R, Navneet Publications Ltd, Karnataka, 1996.

Reference Books

Course Designed By: Ms. R.Keerthika

Course code		BASICS OF GARMENT CONSTRUCTION	L	T	P	C
Allied Course-II		Paper II	6	-	-	5
Prerequisite		Basic knowledge about garment components	Syllabus Version		2025-2030	

Course Objectives:

The main objectives of this course are to:

1. Teach the basics of the functions of the sewing machine and the essential tools
2. Explain the techniques of pattern making, grading and alteration
3. Understand the types of sleeves, yokes and collars

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

CO1	Describe the functions of a sewing machine and the tools needed for sewing	K2
CO2	Compare the methods of preparing pattern	K2
CO3	Appraise the types of sleeve	K4
CO4	Analyze the types of collars and yokes	K4
CO5	Appraise the techniques in pattern layout, alteration and grading	K5

K1 - Remember; **K2** - Understand; **K3** - Apply; **K4** - Analyze; **K5** - Evaluate; **K6** – Create

Unit:1	Essentials of Sewing	6 hours

Parts and functions of a single needle machine, essential tools – cutting tools, measuring tools, marking tools, embroidery tools, general tools, pressing tools,

Body measurement – importance, Method of taking measurements for ladies and men. Measurements required for women's salwar and Kameez. Measurements required for men's shirt and Pant.

Unit:2	Pattern Making and Fitting	6 hours

Pattern Making – Types; Drafting, Draping and Commercial Patterns; Advantages and Limitations.

Methods of transferring pattern markings; Grain – Importance, its types; Fitting - Standards of a good fit,

Unit:3	Sleeve and Its Types	6 hours

Sleeves – definition, types, set-in-sleeves – plain sleeve, puff sleeve, bishop sleeve, bell, circular.

Modified armhole – squared armhole. cap sleeve and Magyar sleeve. Sleeve and bodice combined – raglan, kimono and dolman

Unit:4	Types of Collars and Yokes	6 hours

Collars – definitions, types, peter pan, scalloped, puritan, sailor, square, rippled, full shirt collar, open collar, Chinese, turtle neck, shawl collar

Yokes – types, simple yoke, yoke with fullness within the yoke, yoke supporting/ releasing fullness.

Unit:5	Pattern Alteration, Layout and Grading	6 hours

Pattern alteration – importance of altering patterns, general principles for pattern alteration, common pattern alteration in a blouse.

Pattern layout - definition, purpose, rules in layout, types of layouts Pattern grading (manual) – definition, basic front, basic back basic sleeve

	Total Lecture hours	30 hours

Third Semester

Course code		GARMENT MANUFACTURING TECHNOLOGY	L	T	P	C
Core course		Paper III	3	-	-	3
Pre-requisite		Basic knowledge about sewing machine and stitches	Syllabus Version		2025-2030	

Course Objectives:

The main objectives of this course are to:

1. Learn about the garment industry.
2. Learn the working of the various departments in the garment industry.
3. Learn about the functions of various machinery, stitches and seam finishes used in the garment industry.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

CO1	Remember the working flow of cutting department	K1
CO2	Understand the cutting and sewing machineries used	K2
CO3	Understand the classification of stitches and seams	K2
CO4	Remember the various finishing machineries used	K1
CO5	Evaluate the sewing accessories used in garment industries	K5

K1-Remember; **K2**-Understand; **K3**-Apply; **K4**-Analyze; **K5**-Evaluate; **K6**–Create

Unit:1	Introduction to Apparel Industry	6 hours

Overview of apparel industry, organization structure of apparel manufacturing industry, clothing sizing systems, merchandising, sampling/product development, sourcing, purchase

Unit:2	Spreading and Marker Planning	6 hours

Spreading: Objective Machinery and equipment – manual, semi, fully automatic, Quality requirements for spreading, fabric layout planning and its types. Introduction to markers, marker planning, efficiency of the marker plan, marker making with CAM

Unit:3	Cutting& sewing	6 hours

Introduction to cutting, Mechanism and technical features - Straight knife, round knife, band knife cutting machines, die cutting, laser cutting, plasma cutting, Seams and stitches - classification, sewing needles: Types, size, Sewing machine - classification, parts and functions,
overlock, flatlock, button fixing, button holing

Unit:4	Fusing, Pressing and finishing	6 hours

Fusing equipment, methods, interlinings, process parameters, defects and remedies, quality control in fusing; Pressing – purpose, principles, types of pressing equipment, pressing operations, defects and remedies, quality control in pressing; Packing – types of packing and packing materials, types of carton packing, quality specifications for packing materials, packing requirements, export packing standards, quality control in packing and final inspection procedures.

Unit:5	Apparel Quality Control and Inspection	6 hours

Concepts of quality assurance and quality control, fabric inspection, in-process quality control, sewing quality parameters, measurement and fit inspection, defect classification and analysis, AQL, end-line and final garment inspection, quality audit procedures, buyer quality requirements and compliance standards.

	Total Lecture hours	30 hours

Course Designed By :Ms.M.Abisha	

Course code		CHILDREN'S GARMENT	L	T	P	C
Core practical		Practical III	-	-	5	4
Prerequisite		Basic knowledge about sewing machine and construction.	Syllabus Version		2025-2030	

Course Objectives:

The main objectives of this course are to:

1. Design garments for children, women and men
2. Impart skills in pattern drafting
3. Construct garments by sewing

Expected Course Outcomes:

On successful completion of the course, student will be able to:

CO1	Design garments for child, women and men	K6
CO2	Develop patterns for child, women and men using drafting method	K1
CO3	Select the necessary tools needed for sewing	K2
CO4	Construct garments by sewing	K4
CO5	Discover new techniques in pattern making and garment construction	K5

K1 - Remember; **K2** - Understand; **K3** - Apply; **K4** - Analyze; **K5** - Evaluate; **K6** – Create

1. Design, Draft and construct the following garments for a Child	**30 hours**

1. Infant Dresses: Jabla, Panty
2. Infant Dresses: Bonnet, Baby Frock, Bed Set
3. Toddler's Dresses: Romper, A-line, Summer frock
4. Pre-Schooler's Dresses (Boys): Shirt, Shorts
5. Pre-Schooler's Dresses (Girls): Pinafore, Yoke Frock

	Total Lecture hours	**30 hours**

Text Book(s)

1. Practical Clothing Constructing-Part I and II, Mary Mathews, Cosmic Press, Chennai,1986.
2. Zarapker System of Cutting- Zarapker. K. R, Navneet Publications ltd, India ,2011.

Course Designed By :Ms.M.Abisha

Course code		FABRIC STRUCTURE AND DESIGN	L	T	P	C
Second Allied course		Paper IV	5	-	-	4
Prerequisite		Basic knowledge about weave of different Fabric	Syllabus Version		2025-2030	

Course Objectives:

The main objectives of this course are to:

1. To learn the elements of woven design
2. To study the different types of weave
3. To understand the draft and lifting plan

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

CO1	To classify different types of weaves	K2
CO2	To draw the design, draft and peg plan of weaves.	K6
CO3	To differentiate between different type of weaves	K4
CO4	To construct different types of weaves	K6
CO5	Apply the methods of fabric representation	K3

K1 - Remember; **K2** - Understand; **K3** - Apply; **K4** - Analyze; **K5** - Evaluate; **K6** - Create

Unit:1	Elements of Woven Design	6 hours

Introduction, Classification of Woven structures, Methods of weave, elements of design, draf pesplan, plain weave, plan weave derivatives warp rib weft rib, Types of draft plans. Weaves – Plain, Rib Twill, Satin and Sateen. End uses of the above weaves.

Unit:2	HEAVY FABRICS DESIGN FUNDAMENTALS	6 hours

Honey Comb - ordinary, brighten. Weaves – Huck a Back, Crepe and Mock Leno. End uses of the above weaves.

Unit:3	Figured Fabrics	6 hours

Backed Fabrics - Warp and Weft, Difference between warp and weft backed fabrics. Extra warpand extra weft figuring – single and two colours, Difference between extra warp and extra weft figuring. End uses of the above weaves

Unit:4	Pile Fabrics	6 hours

Pile fabric – Formation of pile – weft pile – plain back, twill back – length, density and fastness of pile – corduroy weft plush. Warp pile – Terry pile, with the aid of wires, face to face warp pile

Unit:5	Double Cloth	6 hours

Double cloth – Classification, Self stitched – Face to back, Back to face, Both. Centre stitched – warp and weft. Interchanging double cloth.

	Total Lecture hours	30 hours

Course code		SURFACE EMBELLISHMENT PRACTICAL	L	T	P	C
Non major elective (A)		Paper III	-	-	4	2
Pre- requisite		Basic knowledge on embroideries	Syllabus Version		2025-2030	

Course Objectives:

The main objectives of this course are to:

1. Inherit embroidery skills by hand and machine
2. Appreciate the beauty and intricacies of the traditional embroideries of India
3. Enhance creativity with the application of smocking

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

CO1	Create hand embroidery samples	K6
CO2	Create machine embroidered samples	K6
CO3	Apply the techniques used in the Indian traditional embroideries	K3
CO4	Design and develop samples for drawn thread embroidery	K6
CO5	Create added structural effects using smocking	K6

K1-Remember; **K2**-Understand; **K3**-Apply; **K4**-Analyze; **K5**-Evaluate; **K6**–Create

Part A	Basic Hand Embroidery	20 hours

Basic Hand Embroidery practice with variations in the following stitches.

1. Running Stitch
2. Back Stitch
3. Stem Stitch
4. Satin Stitch
5. French (Pearl) Knot Stitch
6. Blanket Stitch
7. Chain Stitch
8. Feather Stitch
9. Herringbone Stitch
10. Lazy desi stitch

Part B	Traditional Surface Ornamentation	10 hours

Traditionalsurfaceornamentationpracticeswithvariationsinthefollowing

1. Sequin Work
2. Bead Work
3. Mirror Work

	Total Lecture hours	30 hours

Course code		FUNDAMENTALS OF TEXTILES	L	T	P	C
Non major elective(B)		Paper IV	2	-	-	2
Pre-requisite		Basic knowledge about fabric and textile	Syllabus Version		2025-2030	

Course Objectives:

The main objectives of this course are to:

- To make students understand the origin of clothing.
- To create awareness about clothing culture.
- To impart knowledge of clothing communication and fashion expression.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

CO1	Remember the evolution of costumes across the world	K1
CO2	Understand the beginning of costumes in India during early period	K2
CO3	Understand the growth of various dyed and printed textiles of India	K2
CO4	Remember the various traditional costumes across the states of India	K1
CO5	Analyze the various traditional embroideries	K4

K1-Remember; **K2**-Understand; **K3**-Apply; **K4**-Analyze; **K5**-Evaluate; **K6**– Create

Unit:1	**INTRODUCTION TO TEXTILE**	**6 hours**

Introduction to the field of Textiles – classification of fibres – natural and chemical – primary and secondary characteristics of textile fibres.

Unit:2	**PROPERTIES PROCESS**	**6 hours**

Manufacturing process, properties and uses of natural fibres – cotton, linen, jute, pineapple, hemp, silk, wool, hair fibres, Man-made fibres – viscose rayon, acetate rayon- nylon, polyester, and acrylic.

Unit:3	**SPINNING DEFINITION**	**6 hours**

Spinning – definition, classification – chemical and mechanical spinning – blending, opening, cleaning, doubling, carding, combing, drawing, roving, Spinning-Yarn classification – definition classification – simple fancy yarns, sewing threads and its properties.

Unit:4	**WOVEN**	**6 hours**

Non- woven- felting, fusing, bonding, lamination, netting, braiding and calico, tatting and crocheting

Unit:5	**NON WOVEN**	**6 hours**

Non- woven- felting, fusing, bonding, lamination, netting, braiding and calico, tatting and crocheting

	Total Lecture hours	**36 hours**

Course Designed By : Ms. M.Makthalin Meritta.	

Fourth Semester

Course code		TEXTILES WET PROCESSING	L	T	P	C
Core		Paper - IV	5	-	-	5
Pre-requisite		Basic knowledge in fabrics and chemical reactions	Syllabus Version		2025-2030	

Course Objectives:

The main objectives of this course are to:

1. To know about various preparatory elements of processing.
2. To understand the technical process requirements of dyeing.
3. To learn about the technical process requirements of printing and finishing.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

CO1	Remember various terms of preparatory process and necessary its requirements	K1
CO2	Understand the technicality of wet processing	K2
CO3	Understand the technical inputs in the shop floor and requirements of processing	K2
CO4	Apply the knowledge of the process	K3
CO5	Analyze the core technical inputs of dyeing, printing and finishing.	K4

K1-Remember; **K2**-Understand; **K3**-Apply; **K4**-Analyze; **K5**-Evaluate; **K6**–Create

Unit:1	Textile processing	6 hours

Definition and need for textile processing, dry and wet processing of cotton, silk, wool and synthetic fabrics, preparatory processes – singeing, desizing, scouring, bleaching and mercerization, enzyme treatments and bio-finishing, dyeing and printing processes, finishing treatments, silk degumming, weighting of silk, carbonizing of wool, heat setting of synthetic fabrics, colour fastness, processing defects and quality control in textile processing.

Unit:2	Preparatory Process	6 hours

Singeing - electric and gas singeing. De-sizing - chemical and enzymatic. Scouring – alkaline and enzymatic. Bleaching - hypochlorite and peroxide bleaching, optical whitening. Mercerizing - tension, tensionless and tubular mercerization.

Unit:3	Dyeing	6 hours

Definition of dyes and dyeing, dyeing processes in textile and garment industry, classification and properties of dyes, selection and application of dyes for natural, regenerated and synthetic fibres, Direct, Vat, Reactive, Sulphur, Naphthol, Acid, Basic and Disperse dyes, dye-fibre relationship, colour fastness properties, introduction to dyeing machines, package dyeing machine, winch dyeing machine, jigger dyeing machine, jet dyeing machine and beam dyeing machine, working principles of dyeing machines, batch and continuous dyeing methods, dyeing process sequence, dyeing defects and quality control in dyeing.

Unit:4	Printing	6 hours

Definition, concept and importance of textile printing, comparison between dyeing and printing, styles of printing – direct, resist and discharge printing, methods of printing – block, stencil, roller, screen and transfer printing, print paste ingredients and their functions, pigment printing on cotton and polyester fabrics, reactive printing on cotton and other cellulosic fabrics, printing defects, colour fastness and quality control in printing.

Unit:5	Finishing	6 hours

Definition and objectives of finishing, mechanical finishes – calendaring, raising, shearing and stone washing, chemical finishes – wrinkle-resistant finish, softeners, antimicrobial finish and flame-retardant finish, bio-polishing and other enzyme-based finishes, applications of enzymes in textile processing, finishing defects and quality control in finishing.

	Total Lecture hours	30 hours

Course Designed By: M.Makthalin Meritta	

Course code		TEXTILE WET PROCESSING PRACTICAL	L	T	P	C
Core course		PRACTICAL IV	-	-	4	2
Pre-requisite		Basic practical knowledge in fabrics and various chemical reactions	Syllabus Version		2025-2030	

Course Objectives:

The main objectives of this course are to:

1. To gain practical on hand training on preparatory processes
2. To understand the technical importance of wet processing
3. To plan various process requirements for dyeing and printing

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

CO1	Remember various terms of wet processing	K1
CO2	Understand the technical implications of wet process	K2
CO3	Understand the preparatory processes and its requirements	K2
CO4	Apply the technical concept into the process	K3
CO5	Analyse various chemical reactions and their implications	K4

K1–Remember; **K2**–Understand; **K3**–Apply; **K4**–Analyze; **K5**–Evaluate; **K6**–Create

PartA	Preparatory Process:	**10 hours**

1. Desizing
2. Scouring
3. Bleaching

Part B	Dyeing Process	**10 hours**

1. Direct dyes, sulphur dyes
2. Reactive dyes
3. Acid dyes
4. Basic dyes

Part C	**Printing:**	**10 hours**

1. Direct printing - Block printing, Stencil and Screen Printing. (1 samples each)
2. Resist Printing- Batik (1 samples) and Tie and Dye (5 samples each style)

	Total Lecture hours	**30 hours**

Course Designed By: Ms.R.Keerthika

Course code		SURFACE EMBELLISHMENT PRACTICAL	L	T	P	C
Allied practical II		Allied practical-II	-	-	3	2
Pre-requisite		Basic idea about types of value addition in fabrics	Syllabus Version		2025-2030	

Course Objectives:

The main objectives of this course are to:

1. To practice the skills of surface ornamentation on textile materials.
2. To familiarize students with the techniques of doing basic embroidery stitches.
3. To provide practical knowledge on the traditional embroidery techniques in the modern context.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

CO1	Remember the different embroidery materials, type of needles and their suitability	K1
CO2	Understand and appreciate the traditional surface ornamentation practices.	K2
CO3	Apply skills to enhance the aesthetic value of any fabric through ornamentation	K3
CO4	Analyze the type of embroidery required to interpret the given design	K4
CO5	Create variations in the stitches to develop new design concepts.	K6

K1–Remember; **K2**–Understand; **K3**–Apply; **K4**–Analyze; **K5**–Evaluate; **K6**–Create

Part A	Basic Hand Embroidery	20 hours

Basic Hand Embroidery practice with variations in the following stitches.

LINE STITCH

1. Running Stitch
2. Back Stitch
3. Stem Stitch
4. Chain Stitch
5. SPLIT STITCH
6. Fly Stitch
7. Kantha (West Bengal; Odisha)

FILLING STITCH

1. Satin Stitch
2. Cross Stitch
3. Blanket Stitch
4. Buttonhole Stitch
5. Fishbone Stitch
6. Herringbone Stitch
7. Chikankari (Lucknow)

DECORATIVE STITCH

1. Bullion Knot Stitch
2. French (Pearl) Knot Stitch
3. Feather Stitch
4. Fern Stitch

Part B	Elegant work Surface Ornamentation	10 hours

Traditionalsurfaceornamentationpracticeswithvariationsinthefollowing

1. Aari
2. zardosi work
3. fabric painting
4. Sequin Work
5. Bead Work
6. Mirror Work
7. Fabric Painting

	Total Lecture hours	**30 hours**

Course code		FASHION BUSINESS	L	T	P	C
Second Allied		Paper IV	4	-	-	4
Prerequisite		Knowledge about business fashion	Syllabus Version		2025-2030	

Course Objectives:

The main objectives of this course are to:

1. Gain a better understanding of a fashion designer at the national and international level
2. Impart knowledge on new product development, sales promotion, retailing and pricing
3. Move towards a sustainable fashion

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

CO1	Describe the factors influencing fashion changes	K3
CO2	Weigh the contributions of the fashion designers nationally and internationally	K5
CO3	Understand the steps involved in new product development and sales promotion	K2
CO4	Analyze the scope and functions of retailing and pricing	K4
CO5	Evaluate the environmental pollution created by fashion products and move towards sustainable fashion	K5

K1 - Remember; **K2** - Understand; **K3** - Apply; **K4** - Analyze; **K5** - Evaluate; **K6** - Create

Unit:1	Introduction to Fashion Business	6 hours

Fashion business – Definition, scope and structure of the fashion industry, fashion value chain, global and Indian fashion industry, evolution of fashion business, leading international and Indian fashion designers and their contributions, designer brands and fashion houses, fashion business models and market segments.

Unit:2	Fashion Marketing	6 hours

Fashion marketing – Marketing concepts, consumer buying behavior, market segmentation, target market selection, brand positioning, product life cycle, fashion forecasting and trend analysis.

Unit:3	Fashion Branding	6 hours

Fashion branding – Brand identity, brand equity, brand communication, retail formats, retail store operations, visual merchandising, customer relationship management and omnichannel retailing.

Unit:4	Fashion Entrepreneurship and Business Planning	6 hours

Fashion entrepreneurship – Entrepreneurial opportunities in fashion, business plan development, startup management, funding sources, fashion product development, costing, pricing and business sustainability.

Unit:5	Sustainable Fashion and E-Commerce	6 hours

Sustainable fashion concepts, sustainable materials and sourcing, ethical fashion, circular fashion, slow fashion, upcycling and recycling, green supply chain management, corporate social responsibility, fashion e-commerce, digital marketing, social media marketing and emerging trends in sustainable fashion business.

	Total Lecture hours	30 hours

Course Designed By: Ms.R.Keerthika	

Course code		ACCESSORIES DESIGNING AND MAKING	L	T	P	C
Non Major Elective-I (A)		Non Major Elective	2	-	-	2
Prerequisite		Basic knowledge of fashion design and accessory concepts.	Syllabus Version		2025-2030	

Course Objectives:

The main objectives of this course are to:

1. To understand the fundamentals of accessory design and construction.
2. To develop practical skills in designing and making fashion accessories.
3. To apply design principles and embellishment techniques in accessory development.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

CO1	Understand the fundamentals of accessory design, materials, tools and construction techniques.	K1
CO2	Develop skills in designing and creating a variety of fashion and utility accessories.	K2
CO3	Apply elements and principles of design in the development of aesthetically appealing accessories.	K2
CO4	Utilize appropriate embellishment and finishing techniques to enhance accessory design and functionality.	K2
CO5	Create innovative and sustainable accessories using conventional and recycled materials.	K3

K1–Remember; **K2**–Understand; **K3**–Apply; **K4**–Analyze; **K5**–Evaluate; **K6**–Create

Unit I	**Fashion Accessories Design**	**6 hours**

Introduction to fashion accessories, elements and principles of design, inspiration board, colour board, accessory sketching and design development.

Unit II	**Hair and Decorative Accessories**	**6 hours**

Design and preparation of scrunchie, hair band, head band, fabric flower, brooch and decorative accessories.

Unit III	**Fashion Bags and Utility Accessories**	**6 hours**

Design and construction of tote bag, pouch, wallet, mobile pouch and organizer.

Unit IV	**Fashion Jewellery and Lifestyle Accessories**	**6 hours**

Design and preparation of necklace, bracelet, earrings, belt, scarf embellishment and handcrafted jewellery using different materials.

Unit V	**Sustainable and Creative Accessories**	**6 hours**

Design and development of accessories using recycled and eco-friendly materials; preparation of any two innovative accessories and portfolio presentation.

	Total Lecture hours	**30 hours**

Course code		FUNDAMENTALS OF DESIGNING	L	T	P	C
Non Major Elective-II(B)		Non Major Elective (B)	2	-	-	2
Prerequisite		Basic knowledge about home linens product and uses	Syllabus Version	2025-2030		

Course Objectives:

The main objectives of this course are to:

1. To understand the elements and principles of design and apply it with garment design.
2. To study the wardrobe planning and figure irregularities and design garment according to the specific need.
3. To understand the fashion concepts and scope of fashion industry.
4. To know the basic principles of designing.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

CO1	Remember the home textile product	K1
CO2	Understand the suitable materials for various home furnishing products.	K2
CO3	Apply specific applications	K2
CO4	Analyze suitable materials for various home furnishing products	K3
CO5	Create products with respect to the specific applications	K4

K1–Remember; **K2**–Understand; **K3**–Apply; **K4**–Analyze; **K5**–; **K6**–Create

Unit:1	DESIGN	6 hours

Introduction- Types of Design-Structural and Decorative design, Requirements of Structural and Decorative Design, Elements of Design- Line, Size, Shape, Color and Texture

Unit:2	PRINCIPELS OF DESIGN	6 hours

Introduction-Principles of Design-Balance, Emphasis, Proportion, Rhythm, Harmony and its types. Application of principles of design in dress design.

Unit:3	COLOUR	6 hours

Introduction-,Color theory- Prang color system, Dimension of color-Hue, Value and Intensity. Color schemes in Prang color System.

Unit:4	FIGURE IRREGULARITIES	6 hours

Introduction- Figure Irregularities-Stout figure, Thin figure, Broad shoulders, Narrow Shoulders, Faces Round, Large, and Small face.

Unit:5	WARDROBE PLANNING	6 hours

Introduction-Factors to be considered while selecting clothes for different age group–Men, Women and Children**.**

	Total Lecture hours	30 hours

Text Book(s)

2.	Subtra Das, "Performance of home textiles", Woodhead Publishing India Pvt. Ltd, New Delhi, 2010, ISBN: 9780857090072

Course Designed By: Ms.R.Keerthika

Fifth Semester

Course code		TEXTILE TESTING	L	T	P	C
Core		Core paper V	5	-	-	5
Prerequisite		Basic knowledge about technical testing for fibre,yarn,fabric	Syllabus Version		2025 -2026	

Course Objectives:

The main objectives of this course are to:

1. To develop a thorough understanding of moisture atmospheric conditions affecting fiber properties.
2. To equip students with the knowledge and skills to perform comprehensive testing of fibers, yarns, and fabrics.
3. To enable students to evaluate both the physical and functional properties of textiles, including strength, durability, aesthetic qualities, and protective characteristics

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

CO1	Understand the concepts of fiber properties	K2
CO2	Apply appropriate fiber testing techniques	K3
CO3	Perform yarn testing to determine yarn count, twist, strength, crimp, hairiness.	K4
CO4	Perform yarn testing to determine yarn count, twist, strength, crimp, hairiness.	K3
CO5	Evaluate fabric aesthetic and functional properties	K2

K1–Remember; **K2**–Understand; **K3**–Apply; **K4**–Analyze; **K5**–Evaluate; **K6**–Create

Unit:1	Introduction of textile testing	6 hours

Introduction Of Textile Testing, Classification Humidity: Definition and its influence on fiber properties Standard atmospheric condition,Standard testing atmosphere. Standard regain, Moisture content and regain. Measurement of atmospheric condition – wet and dry bulb Hygrometer, slings Hygrometer and Digital Hygrometer & Humidity Chambers and Moisture Management in Functional Textiles.

Unit:2	Fibre Testing	6 hours

Fiber Testing: Fiber length – Baer sorter and Fibrograph, Fiber strength – Stelometer, Fiberfineness – Micronaire, Fiber maturity, Trash content - determination – Trash analyzer, **High Volume Instrument,** Advanced Fiber Information System

Unit:3	Yarn Testing	6 hours

Yarn testing: Determination of yarn count – quadrant, Beesley balance. Twist –Direction of twist and amount of twist, Strength of Yarn-Single yarn strength. Crimp – Shirley crimp tester. Hairiness – Uster Hairiness tester, Yarn Evenness Testing – Uster Tester, **Coefficient of Variation (CV %)**

Unit:4	Fabric Testing	6 hours

Fabric Testing: Fabric strength tester – Tensile strength, tearing strength & bursting strength. Abrasion – pilling – Martindale pill box tester. Tensile Testing under Wet and Dry Conditions, Tensile Testing under Wet and Dry Conditions

Unit:5	Evaluation Of Aesthetic And Functional Properties Of Fabrics	6 hours

Drape – Drape meter, Fabric stiffness - Shirley stiffness Tester, crease recovery – Shirley crease recovery tester, water absorbency test, Water repellency tester and Testing for UV Protection

	Total Lecture hours	30 hours

Text Book(s)	
1	**Physical Testing of Textiles** by B.P. Saville is a comprehensive book that covers all major aspects of textile testing
2	**Principles of Textile Testing** by J.E. Booth is a classic textbook that focuses on physical testing methods for fibers

Reference Books	
1	**Textile Science** by E.P.G. Gohl and L.D. Vilensky covers fundamental fiber properties and their testing
2	**Textile Testing** by Angappan and Gopalakrishnan offers insights into a broad range of testing procedures for fibers
	Functional Finishes in Textiles by R. Senthil Kumar discusses advanced testing methods related to fabric functional properties such as water repellency

Course code		GARMENT QUALITY AND COST CONTROL	L	T	P	C
Core		Paper VI	5	-	-	5
Prerequisite		Basic knowledge on garment quality and cost control	Syllabus Version	2025-2030		

Course Objectives:

The main objectives of this course are to:

1. To learn the concepts of garment quality control
2. To study the different quality management systems
3. To know about different quality process

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

CO1	Define and establish quality standards	K2
CO2	Describe functions of quality control	K1
CO3	Analyze on garment cost and cost control	K4
CO4	Appraise on different quality management systems	K4
CO5	Evaluate the quality based on the parameters	K5

K1 - Remember; **K2** - Understand; **K3** - Apply; **K4** - Analyze; **K5** - Evaluate; **K6** - Create

Unit:1	Quality Control and its Standards	6 hours

Definition and Scope of Quality control – establishing merchandising standards- establishing raw material quality control specifications – quality control of raw material. Quality control inspection procedures for processing- Quality control of finished garments – Quality control for packaging,

Unit:2	Functions Of Production Control	6 hours

Function of production control – Production analysis – Quality specifications – quantitative specifications –Basic production systems – whole garment, departmental whole garment, subassembly systems and progressive bundle systems.

Unit:3	Functions of Cost Control	6 hours

Functions of cost control, types of costs and expenses – Apparel manufacturing cost categories – sales cost control, purchasing cost control, production cost control, administration cost control.

Unit:4	Quality Management	6 hours

Quality – Evolution of Quality management – Quality function and quality planning – Basic concepts of Total Quality Management (TQM) – Principles of TQM – Quality Trilogy – Four pillars of TQM – PDCA cycle & PDSA cycle – Kaizan concept – 5"S Philosophy – Quality circles.

Unit:5	Environmental Management System	6 hours

Environmental Management System (EMS) – Meaning & Definition – Elements of EMS – Benefits of EMS – Environmental Policies – Implementation of ISO 14000.

	Total Lecture hours	30 hours

Course code		COMPUTER AIDED DESIGNING PRACTICAL	L	T	P	C
Core Practical		Practical V	-	-	4	5
Prerequisites		Basic knowledge on computers application in garment industry	Syllabus Version		2025 - 2026	

Course Objectives:

The main objectives of this course are to:

1. Enable the students to design garment designs using computers
2. Try various colour combinations and textural effects
3. Create and manipulate fashion figures for various garment designs

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

CO1	Understand and practice the tools and techniques of CAD	K2
CO2	Apply the skills in area of garment designing	K3
CO3	Develop various colours and textures in computers	K6
CO4	Create garment designs for child, men and women with CAD	K6
CO5	Create Jewellery designs using CAD	K6

K1 - Remember; **K2** - Understand; **K3** - Apply; **K4** - Analyze; **K5** - Evaluate; **K6** - Create

1.Application of Elements and Principles of Design in Garments — **8 hours**

Elements of Design

- Line
- Shape
- Texture

Principles of Design

- Balance
- Rhythm
- Emphasis
- Harmony
- Proportion

2. Color Harmony in Garment Design — **8 hours**

- Analogous Colour Harmony
- Complementary Colour Harmony
- Double Complementary Colour Harmony
- Triadic Colour Harmony
- Neutral Colour Harmony

3.Application of Design in Garments — **7 hours**

- Structural Design
- Decorative Design
- Silhouette Development
- Garment Detail Development (Collars, Sleeves, Pockets, Cuffs and Yokes)

4. Design garments for the following: — **7 hours**

- Party Wear- Men& Women Garments
- Casual Wear- Men& Women Garments
- Sports Wear- Men &Women Garments

Total Lecture hours — **30 hours**

Course code		ADULT'S GARMENTS PRACTICAL	L	T	P	C
Core Practical		Practical VI	-	-	4	4
Pre-requisite		Detail knowledge about garment construction	Syllabus Version		2025 - 2026	

Course Objectives:

The main objectives of this course are to:

1. Learn the process flow of various garments.
2. Learn the construction of different men's, kids and lady's garments.
3. Create various woven garments.

Expected Course Outcomes:

On this successful completion of the course, student will be able to:

CO1	Remember various machineries used in manufacturing garments.	K1
CO2	Understand the various operations involved in garment manufacture	K2
CO3	Apply various stitch types in the construction of garment	K3
CO4	Understand the stitching process in the production of woven garment manufacture	K2
CO5	Create different types of garment proto type	K6

K1–Remember; **K2**–Understand; **K3**–Apply; **K4**-Analyze; **K5**-Evaluate; **K6**–Create

	Garment Construction – women's	**20 Hours**

- Saree Petticoat
- Kameez
- Salwar
- Nightdress / Housecoat
- Blouse
- Kurta
- Pyjama

	Garment Construction – men's & fashion wear	**10 Hours**

- Shirt
- Pant
- Fashionable Wear

	Total Lecture hours	**30 hours**

Text Book(s)

1	Garment Construction: A Complete Course in Making Clothing for Fit and Fashion, Peg Couch, Fox Chapel Publishing, UK, 2011.
2	Garment Manufacturing Technology, Edited by Rajishore Nayak and Rajiv Padhye, Woodhead Publishing Series in Textiles, UK 2015.
3	Industry Clothing Construction Method, Mary Ruth Shields, FairChild BooksLtd, UK, 2011

Reference Books

1.	Garment Construction Skills, Premlata Mullic, Kalyani Pulishers, Karnataka, 2010.

Course Designed By:Ms.R.Keerthika

Course code		INDUSTRIAL ENGINEERING IN APPAREL	L	T	P	C
Major based Elective-I		Major based Elective	4	-	-	4
Prerequisites		knowledge of apparel manufacturing processes, sewing technology, production systems, quality control and production planning concepts	Syllabus Version		2025-2026	

Course Objectives:

1. To understand the principles and applications of Industrial Engineering techniques in apparel manufacturing for improving productivity and efficiency.
2. To develop knowledge in production planning, work measurement, line balancing, ergonomics, and workplace safety in the apparel industry.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

CO1	Explain the fundamentals of Industrial Engineering, production systems, and the role of Industrial Engineers in the apparel industry.	K1
CO2	Discuss production planning and control techniques, machinery allocation, scheduling, and lean manufacturing concepts in apparel production.	K2
CO3	Apply method study, motion study, and work measurement techniques to improve operational efficiency and productivity.	K3
CO4	Analyze factory layouts, line balancing methods, manpower requirements, and productivity measures in garment manufacturing units.	K4
CO5	Develop ergonomic and workplace safety solutions using modern industrial engineering practices for sustainable apparel production.	K5

K1 - Remember; **K2** - Understand; **K3** - Apply; **K4** - Analyze; **K5** - Evaluate; **K6** – Create

Unit:1	**Fundamentals of Industrial Engineering**	6 hours

Introduction to Industrial Engineering, concepts and terminology, history and evolution, roles and responsibilities of Industrial Engineer, key performance measures, apparel production systems, progressive bundle system, synchro straight line system, Unit Production System (UPS), quick response production system.

Unit:2	**Production Planning and Control**	6 hours

Production planning and control, bottleneck identification, machinery allocation, scheduling, routing and tracking, automation in production systems, plant load and capacity planning, material handling, lean manufacturing concepts.

Unit:3	**Method, Motion and Work Study**	6 hours

Method study, process charts, motion study, principles of motion economy, micro motion study, time study, work measurement, Standard Allowed Minute (SAM), work sampling.

Unit:4	**Layout Planning and Productivity Improvement**	6 hours

Factory layout planning, workstation design, layout planning, line balancing, operating line efficiency, productivity measurement, line target, manpower requirement.

Unit:5	**Workplace Safety, Ergonomics and Contemporary Issues**	6 hours

Workplace safety, ergonomics, lighting and ventilation, temperature and noise control, work environment safety, ergonomic problems, contemporary issues in apparel industrial engineering

	Total Lecture hours	**30 hours**

Text Book(s)	
1	*Industrial Engineering in Apparel Production* – V. Ramesh Babu
2	*Industrial Engineering in Apparel Manufacturing: A Practitioner's Handbook* – Prabir Jana & Manoj Tiwari
3	*Introduction to Work Study* – George Kanawaty (ILO Publication)
4	*Factory Physics: Foundations of Manufacturing Management* – Wallace Hopp & Mark Spearman
Reference Books	
1	*Apparel Manufacturing: Sewn Product Analysis* – Glock & Kunz
2	*Introduction to Work Study* – George Kanawaty

Course Designed By: Ms. M. Makthalin Meritta	

Course code		WARDROBE PLANNING AND STORE MANAGEMENT	L	T	P	C
Major based Elective-II		Paper II - A	4	-	-	4
Prerequisites		Knowledge about the store visual merchandising	Syllabus Version		2025-2026	

Course Objectives:

The main objectives of this course are to:

1. General principles for wardrobe planning and clothing accessories purchases.
2. Delineate principles of appropriate dress for various occasion
3. Understand customer needs and purchase product effectively.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

CO1	Understand the basic concepts of store layout	K2
CO2	Describe the types of **Wardrobe Planning – Age group**	K1
CO3	Explain the process	K1
CO4	Discover the importance	K3
CO5	Interpret types of stores, design, layouts and merchandise presentation	K2

K1 - Remember; **K2** - Understand; **K3** - Apply; **K4** - Analyze; **K5** - Evaluate; **K6** – Create

Unit:1	**Wardrobe Planning – Age group**	6 hours

Wardrobe planning for different age groups, factors influencing wardrobe selection, fashion and season, Designing dresses for different occasions business meetings, parties/ dinners, evenings/leisure hours, marriage functions, sports, uniforms for civil service, airhostess, hoteliers, schools – girls and

Unit:2	**Store Planning - Layout**	6 hours

Objective of store layout design, selecting a layout, locating departments within the store, merchandise management and principles of merchandise management

Unit:3	**Store Management**	6 hours

Store Management – classification, product store, service store, store terminology and evolution of store management. Store challenges – threat of new competition, power of buyers and suppliers Consumers buying patterns, factors influencing store management , Store Windows, Creative Displays; Signage, Color; Music; Scent

Unit:4	**Market Segmentation**	6 hours

Store market segmentation and strategies, types of store segments. Store space management, space utilization. Space usages in stores. Store layout and design. Store design with view to retail strategy, constraints while designing a retail store, layout, layout planning, layout as an indicator of competitiveness, layout types; signage and graphics

Unit:5	**Visual Merchandising**	6 hours

Visual merchandising, advertising, sales promotion, customer relationship management, elements of store management and communication. Emerging trends in store management .

	Total Lecture hours	30 hours

Course Code		INTERNSHIP TRAINING	L	T	P	C
Internship		Viva Voce	-	-	-	2
Pre-requisite	Basic knowledge in designing and garment industry		Syllabus Version	2025-2026		

Course Objectives:

The main objectives of this course are to:

1. Students will be visiting different manufacturing units and will experience practical learning
2. Students will be able to create data and information's
3. Student will be able to record all the data through internship record which will be presented at the end of the training

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

CO1	The schedule of the internship should be divided into various departments	K2
CO2	Complete data should be collected for individual department and industry process wise based on an approved questionnaire	K3
CO3	All the collected data should be reviewed and accumulated	K4
CO4	Report preparation should be done	K4
CO5	A proper presentation should be made by the student upon which the student Will get a clear view of industrial process	K5

K1-Remember;**K2**-Understand;**K3**-Apply;**K4**-Analyze;**K5**-Evaluate;**K6**-Create

INTERNSHIP GUIDELINES

- Students shall undergo a minimum of **15 working days of full-time industrial training** in recognized Fashion, Textile, Apparel, Garment Manufacturing, Export Houses, Buying Houses, Fashion Design Studios, Retail Organizations, Textile Processing Units or allied industries approved by the Department.
- The internship shall provide exposure to at least two functional areas such as Production, Merchandising, Quality Control, CAD, Product Development, Textile Processing, Fashion Design, Retail Management, Industrial Engineering or Export Operations.
- Students may undergo training individually or in groups not exceeding four members. The Department shall provide the necessary formats and guidelines before the commencement of the internship.
- Students shall maintain a daily record of activities and observations during the training period and submit the Internship Report, Attendance Certificate, Performance Appraisal and Completion Certificate duly signed and sealed by the industry authority.
- Students shall attend the review meeting and present their internship experience through a PowerPoint presentation.
- The final evaluation shall be based on Attendance and Industry Evaluation, Internship Report, PPT Presentation and Viva-Voce Examination.
- Students are encouraged to observe sustainability practices, quality systems, compliance standards and technological advancements adopted by the organization during the internship period.

Course code		EXPORT DOCUMENTATION	L	T	P	C
Skill Based Subject - I		Skill Based Subject		-	-	3
Prerequisites		Basic knowledge on textile fibers, yarns, and fabric structures.	Syllabus Version		2025-2026	

Course Objectives:

The main objectives of this course are to:

1. To explore the knowledge about the regulation of AEPC
2. To apply the terms and methods in the documentation purpose
3. To understand about the license procedure, pre-shipment charges and transaction

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

CO1	Understand the basics of international trade,	K2
CO2	Apply knowledge of export business setup, including export marketing.	K3
CO3	Differentiate between domestic and international trade, explain the functions.	K4
CO4	Identify and prepare various types of export documentation accurately	K3
CO5	Understand the provisions of India's Export-Import (Exim) Policy and analyze.	K2

K1 - Remember; **K2** - Understand; **K3** - Apply; **K4** - Analyze; **K5** - Evaluate; **K6** - Create

Unit:1	Introduction to Export Management	6 hours

Introduction to Export Market: Basics of international trade and its significance. Role of WTO and regional economic groups in international trade. International trade statistics of textiles and apparel. Importance of Apparel Exports in Indian Economy, Prospects for Indian apparel exports and SWOT analysis. Classification of Exporters: Merchant, Manufacturer, Deemed, etc..

Unit:2	International Trade and Business Environment	6 hours

Trade: Domestic trade vs international trade, regional trade blocks, nature of foreign exchange market, main functions, business & environment – social & logical. Business.

Unit:3	Export Business and Product Planning	6 hours

Export Business: Setting up of export business - export marketing organization, product planning for export markets, export pricing and costing, International Commercial (Inco) Terms. Export correspondence -negotiations for export business. Procedure for Starting an Apparel Export Business.

Unit:4	Export Documentation	6 hours

Types of Export Documentation: Commercial, Regulatory, Transport, Financial, Export Documents: Commercial Invoice, Packing List, Certificate of Origin, Shipping Bill, Bill of Lading / Airway Bill, Export Declaration Forms, Digitalization of Export Documentation .

Unit:5	Export Policy and Promotion Schemes	6 hours

India's EXIM Policy, export promotion schemes, duty drawback, duty exemption, EOU, FTZ, SEZ, export houses, export promotion councils, MSMEs and MSME support schemes for exporters, sustainability and compliance in apparel exports.

	Total Lecture hours	30 hours

Text Book(s)	
1	**"Export Management" by Justin Paul** (2016, Oxford University Press) — Covers international trade, export setup, marketing strategies, and export documentation with practical case studies.
2	**"International Trade and Export Management" by Francis Cherunilam** (2019, Himalaya Publishing House) Explains trade theories, export-import policies, documentation, promotion schemes, and WTO roles.
	"Global Marketing and Export Management" by Gerald Albaum, Edwin Duerr, and Alexander Josiassen (2017, Pearson Education) Focuses on global marketing, export planning, market entry, pricing, and documentation with practical examples.
Reference Books	
1	**"Export Marketing" by Kenneth L. Gamble** (2015, Pearson Education) Provides detailed insights into export marketing strategies, market research, and international trade regulations.
2	**"International Business: Environment and Operations" by John D. Daniels, Lee H. Radebaugh, and Daniel P. Sullivan** (2018, Pearson Education) Covers the broader aspects of international business, including trade policies, export-import procedures, and global business environment.

Course code		APPAREL PRODUCTION AND PLANNING	L	T	P	C
Skill Based Elective -I		Skill Based Subject	-	5	-	3
Prerequisites		Basic knowledge on apparel production and planning	Syllabus Version		2025-2026	

Course Objectives:

The main objectives of this course are to:

1. To enable the students to learn about the apparel production systems
2. To impart knowledge on different tools and techniques in apparel industry with respect to production
3. To provide clear insights on production, layout and capacity planning

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

CO1	Define and establish the appropriate methodology for garment	K2
CO2	Describe functions of , system, tools and techniques	K1
CO3	Analyze on garment production and planning	K4
CO4	Appraise on different capacity	K4
CO5	Evaluate the utilizing the available resources	K5

K1 - Remember; **K2** - Understand; **K3** - Apply; **K4** - Analyze; **K5** - Evaluate; **K6** - Create

Unit:1	Concepts of Production and Productivity	6 hours

Introduction, production, productivity, occupational standards, productivity measures, tools and techniques used in apparel production, roles and responsibilities of industrial engineer, production in- charge

Unit:2	Production Planning	6 hours

Production Planning - Volume, Process, Operation; System - Product planning, Process Planning; cut to ship ratio, labour cost per minute, on-time delivery, capacity planning and utilization, follow-up, WIP, operation bulletin, operator performance, lead time, overtime %, absenteeism, production planning and control (PPC) Advantages and Disadvantages of apparel production systems

Unit:3	Method, Motion and Time study	6 hours

Method: Recording the method, flow diagram, flow process grid and charts, man-machine chart, construction of flow process grids, operation break down, calculating SAM value for Shirt, T-shirt, benefits
Motion: Principles of motion economy, two hand process chart, micro motion, methods improvement
Time: Techniques of work measurement, time study, selecting job, SAM, rating factor, allowances

Unit:4	Plant layout	6 hours

Layout objectives, types of plant layout - process, product, fixed, combined, layout based on flow of material; Minimum travel, sequence, safety, satisfaction, usage, compactness, flexibility, factors influencing plant layout, designing and evaluating the layout

Unit:5	Advances in Apparel Production	6 hours

Industrial advancements, models used in apparel production and new product development, product development tools and applications, product lifecycle management, demand-led new product Development

	Total Lecture hours	30 hours

Text Book(s)

Sixth Semester

Course code		FASHION BRANDING AND PROMOTION	L	T	P	C
Core Course		Paper VII	4	-	-	4
Pre-requisite		Advanced knowledge about fashion branding And fashion markets	Syllabus Version		2025-2026	

Course Objectives:

The main objectives of this course are to:

1. To instruct various promotional activities for brand communication
2. To educate goals and tactics in branding strategies
3. To impart knowledge on advertising and business model.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

CO1	Remember Fashion cycle and brand	K1
CO2	Understand how to develop brand	K2
CO3	Apply various effective advertishment	K3
CO4	Analyze various levels of promotions	K4
CO5	Evaluateon fashion marketing	K5

K1-Remember; **K2**-Understand; **K3**-Apply; **K4**-Analyze;**K5**-Evaluate; **K6**–Create

Unit:1	Fundamentals of Fashion Branding	6 hours

Brand – definition, characteristics, value and importance in marketing; Branding Concept- Building brand awareness, brand communication, brand personality, brand image and brand identity, brand equity, brand positioning, brand gap

Unit:2	Development of Brand	6 hours

Fashion branding Elements and its types– Brand name decision, Logo, Symbol, Abstract marks, Emblems, Dynamic marks, Characters; Co-branding, Corporate branding; Trends and Challenges in Fashion Branding; National Fashion Brands vs International Fashion Brands.

Unit:3	Brand Advertisement Model	6 hours

Brand Advertisement - goals, AIDA model, DAGMAR model; Media strategy: advertising types- billboards, advertising campaigns, advertising photography and others; Importance of communication in Advertising

Unit:4	Promotion and Brand dynamics	6 hours

Promotion – types, segmentation and value proposition; Advertising message: message objectives, recall, attitude, emotions and feelings; Fashion Brand Personality and Advertising Responses – Building Fashion Brand Personality via Advertisement

Unit:5	Communication in Advertising and Marketing	6 hours

Role of communication in Advertising and Marketing - Target Customers - Media Communication Strategy and Tactics; Preparing a Communication Plan – Types: Video, Audio, Print Media, Out-of-Home Media, Search Engine Marketing, Sales Promotion, Media and Campaign Measurement

	Total Lecture hours	30 hours

Course Designed By: Mr. M. Udhayasangar.	

Course code		TECHNICAL TEXTILE	L	T	P	C
Core Course		Paper VIII	4	-	-	4
Pre-requisite		Basic Concepts in Developing Intelligent Textile	Syllabus Version		2025-2026	

Course Objectives:

The main objectives of this course are to:

1. To understand the basic concepts in developing intelligent textiles.
2. To impart the knowledge on embedded electronics to design wearable and smart textiles.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

CO1	Remember the smart system	K1
CO2	Understand about high performance fiber	K2
CO3	Apply 3D garments in commercial	K3
CO4	Analyze varies uses of smart clothing	K4
CO5	Evaluate the application of smart textiles	K5

K1–Remember; **K2**–Understand; **K3**–Apply; **K4**–Analyze; **K5**–Evaluate; **K6**–Create

Unit:1	Introduction to Technical Textiles	5 hours

Definition, scope and classification of technical textiles, technical fabric structures, woven, non-woven and knitted technical textiles, growth and applications of technical textiles.

Unit:2	Smart Clothing and Smart Textiles	7 hours

Introduction to smart textiles and smart clothing, classification of smart textiles, passive, active and intelligent textiles, conductive fibres and fabrics, sensors and actuators in textiles, electronic textiles (E-textiles), applications of smart clothing in healthcare, sports, military and fashion industries..

Unit:3	Medical and Survival Textiles	7 hours

Introduction to medical textiles, non-implantable textiles, implantable textiles, healthcare and hygiene textiles, survival textiles, tents, helmets, gloves, sleeping bags, survival bags and protective suits

Unit:4	Transportation and Geotextiles	6 hours

Textiles in automobiles, road vehicles, railways, aircraft and marine applications, introduction to geotextiles, essential properties and applications of geotextiles, natural fibres for soil strengthening and erosion control.

Unit:5	Protective and Smart Textiles	5 hours

Textiles for protection, thermal insulation materials, camouflage, concealment and deception, flame- and heat-protective textiles, ballistic protective materials, intelligent textiles, wearable electronics, smart wearable systems and emerging applications of technical textiles.

	Total Lecture hours	30 hours

Text Book(s)	
1	Xiaogang Chen, “Advances in 3D Textiles”, The Textile Institute, Woodhead Publications, Cambridge, UK, 2015.
2	Horrocks A. R. and Anand S. C, "Handbook of Technical Textiles", The Textile Institute, Woodhead Publications, Cambridge, UK, 2016
Reference Books	
1	Yimin Qin, “Medical Textile Materials”, The Textile Institute, Woodhead Publications, Cambridge, UK, 2016.
2.	Jinlian Hu, “Active Coatings for Smart Textiles”, The Textile Institute, Woodhead Publications, Cambridge, UK, 2016.

Course Designed By: Ms. G. Narmatha.	

Course code		FASHION DESIGN PORTFOLIO	L	T	P	C
Core Practical		Core Practical VII	-	-	4	4
Prerequisites		Garment Designing Knowledge	Syllabus Version		2025-2026	

Course Objectives:

The main objectives of this course are to:

1. Create garment collection based on an inspiration / theme
2. Search and find out exclusive fabrics and accessories for the garment collection
3. Present the garment collection in the form of a portfolio album

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

CO1	Design garment collection based on an inspiration / theme	K6
CO2	Develop various boards like theme board, mood board, story board, colour board, fabric swatch board, patern board and flat pattern	K6
CO3	Select suitable fabrics and accessories for the garment collection	K5
CO4	Create a portfolio album	K6
CO5	Compile and present the portfolio effectively	K6

K1 - Remember; **K2** - Understand; **K3** - Apply; **K4** - Analyze; **K5** - Evaluate; **K6** - Create

Details of the Portfolio **(30 hours)**

The Portfolio must be created as an album / book / Magazine and should contain the following boards

- Customer Profile
- Inspiration / Theme Board
- Mood Board / Story Board
- Color board / Swatch Board
- Accessory Board (optional)
- Pattern Board
- Flat Sketch / Fashion Illustrations
- Photograph of all the Garment

Evaluation of the Project

The student should present the portfolio and the garments to the panel of examiners and answer the questions raised by the examiners

1.	Campbell, Det. Al (2001): How to develop a professional portfolio: Ally & Bacon by Waterier, John.
2.	Asplundh Karl, 2010, Design Process, Fairchild Publication
3.	Sieve wrights Simon 2012, Basics Fashion Design -Research and Design, Bloomsbury Publication India.
4.	Fashion design and drawing course – Caroline Tatham & Julian Seaman, 20th-century
	Fashion-John Peacock.

Course Designed By: Ms.R.Keerthika

Coursecode		HOME TEXTILE	L	T	P	C
Major Based Elective - II		ELECTIVE	-	-	5	3
Pre-requisite		Advanced knowledge in home textile designs	Syllabus Version		2025-2030	

Course Objectives:

1. To understand the importance of household materials and it application areas.
2. To know about the various production centers in India.
3. To understand the production techniques, various selection criterion such as raw materials, design and fabric type.
4. To know about the varieties of Home textile products and fibre used for manufacturing the products.
5. To understand the quality aspects for home textiles

Expected Course Outcomes:

On the successful completion of the course, student will be ableto:

CO1	Analyze Advanced knowledge in home textile designs	K4
CO2	Create the various type of home products.	K6
CO3	Apply different type fabric in home textile products.	K3

K1–Remember; **K2**–Understand; **K3**–Apply; **K4**–Analyze; **K5**–Evaluate; **K6**–Create

UNIT-1	INTRODUCTION	6 hours

Introduction to home textiles, definition, types of home textiles, factors influencing selection of home textiles, recent trends in home textiles.

UNIT-2	FLOOR AND WALL COVERINGS	6 hours

Definition, types of floor covering –hard, soft and resilient floor coverings and uses and care and maintenance of floor coverings. Wall covering- definition, uses, care and maintenance of wall coverings.

UNIT-3	DOOR AND WINDOW TREATMENTS	6 hours

Definition and parts of door and windows, curtains and draperies –definition and materials used for curtains and draperies. Types of Curtains –draw, tailored, pleated, cafe, three tier curtains. Types of Draperies – swags. Accessories- rods hook, rails, racks, curtain tape pins

UNIT-4	LIVING AND BEDROOM LINENS	6 hours

Soft furnishings for living and bed linen. Introduction to living and bedroom linens, types-sofa, sofa covers, wall hangings, cushion, cushion covers, upholsteries, bolster and bolster covers, bed sheets, covers, blankets, blanket covers, comfort and comfort covers, bed spreads, mattress and mattress covers, pillow and pillow covers, pads, uses and care.

UNIT-5	KITCHEN AND TABLE LINENS	6 hours

Soft furnishings for kitchen and dining, types of kitchen linens – kitchen towel, aprons, dish cloth, fridge, grinder and mixie covers, mittens, fridge holders –their uses and care. Types of dining table mat, dish/pot holders, cutlery holder, fruit baskets, hand towels-uses and care.

Course code		CARE AND MAINTENANCE OF TEXTILES	L	T	P	C
Major Based Elective - II		Elective B	4	-	-	2
Pre-requisite		Basic knowledge about fabric care	Syllabus Version		2025-2030	

Course Objectives:

The main objectives of this course are to:

1. Study of different industry materials for cleaning, pressing and finishing textiles.
2. To learntheappropriateequipmentandproceduresforthecareoftextileproducts.
3. To understand the symbols used in textile care labeling systematan international level

Expected Course Out comes:

On the successful completion of the course, student will be able to:

CO1	Understand the use equipment to clean and care for the variety of fabrics safely	K2
CO2	Analyze the suitable laundering techniques for arrange of textile items	K4
CO3	Remember the importance of care labels in use and maintenance of textileproducts	K1
CO4	Understand the special laundering & stain removal techniques	K2
CO5	Analyze the proper caring technique to sustain the functional and a esthetic value of the apparels.	K4

K1–Remember;**K2**–Understand;**K3**–Apply;**K4**–Analyze;**K5**–Evaluate;**K6**–Create

Unit:1	Clothing Care Essentials	6 hours

Water-hard and soft water, methods of softening water. Laundry soaps–types of soap, soap less detergents, chemical action, detergent manufacture, advantage so detergents.

Unit:2	Finishes & Stiffening Agents	6 hours

Finishes–Stiffening Agents–Starch(cold water and hot water), Other stiffening agents, preparation of starch. Laundry blues, their application.

Unit:3	Laundry & Drying Equipment's	6 hours

Laundry equipment–for storage, for steeping and Washing–Wash board, suction washer, wash boiler, washing machine. Drying equipment's–outdoor and indoor types .Iron sand ironing board –types of iron(box, flat, automatic, steam iron).Ironing board–different types.

Unit:4	Principles of Washing	6 hours

Principles of washing–suction washing, washing by kneading and squeezing, washing by machine– Process details and machine details. Laundering of different fabrics–cotton and linen, woolens, colored fabrics, silks, rayon and nylon.

Unit:5	Care Labels	6 hours

Care labels– importance, symbols, uses.,washing, bleaching, drying, ironing and different placements of label ingarments.

	Total Lecture hours	30 hours

Course code		PROJECT	L	T	P	C
Project		Viva-voce	4	-	-	2
Pre-requisite		Basic knowledge about Research and development of design	Syllabus Version		2025-2030	

The candidate shall be required to take up a Project Work by group or individual and submit it at the end of the final year. The Head of the Department shall assign the Guide who, in turn, will suggest the Project Work to the students in the beginning of the final year.

A copy of the Project Report will be submitted to the University through the Head of the Department on or before the date fixed by the University. The Project will be evaluated by an internal and an external examiner nominated by the University.

The candidate concerned will have to defend his/her Project through a Viva-voce.

ASSESSMENT/EVALUATION/VIVA VOCE:

1. **PROJECT REPORT EVALUATION (Both Internal & External)**
   I. Plan of the Project - 20 marks
   II. Execution of the Plan/collection of - 45 marks Data / Organization of Materials / Hypothesis, Testing etc. and presentation of the report.
   III. Individual initiative - 15 marks
2. Viva-Voce / Internal & External - 20 marks
   TOTAL - 100 marks

PASSING MINIMUM: Project Vivo-Voce 20 Marks 40% out of 20 Marks (i.e. 8 Marks) Dissertation 80 Marks 40% out of 80 marks (i.e. 32 marks)

3.A candidate who gets less than 40% in the Project must resubmit the Project Report. Such candidates need to defend the resubmitted Project at the Viva-voce within a month. A maximum of 2 chances will be given to the candidate.

Course code		BOUTIQUE MANAGEMENT	L	T	P	C
Skill Based Elective - II		Elective - III	4	-	-	4
Pre-requisite		basic concepts of boutique management	Syllabus Version		2025-2030	

Course Objectives:

- Acquire boutique managerial skills
- Understand the intricacies of retail business.
- Apply the managing and startup the boutique business.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

CO1	Remember and apply different mode of **boutique** in fashion.	K1
CO2	Understand the **Boutique Management**.	K2
CO3	Apply various type of essentials fashion.	K3
CO4	Analyze their own boutique plans or manage the boutique Students get the ability to sell and market the product.	K4
CO5	Analyze	K4

K1-Remember; **K2**-Understand; **K3**-Apply; **K4**-Analyze;**K5**-Evaluate; **K6**–Create

Unit:1	INTRODUCTION TO BOUTIQUE	6 hours

Boutique – definition – management Skills required to set up a boutique – identifying target market and customer – selection of boutique name – types of boutique – low- endand high- end boutiques

Unit:2	INFRASTRUCTURE AND VISUAL MERCHANDISING	6 hours

Choice of location and space management – infrastructure requirement – fashion accessories in boutique – boutique interior – visual merchandising – store layout – types of display – exterior display – interior display – tools for visual merchandising – signage –props – mannequins – fixtures and lightings.

Unit:3	RESOURCE MANAGEMENT	6 hours

Staffing – selection of generalists and specialists – Customer relationship management –Manpower planning – performance management – employee relations

Unit:4	TOOLS AND MATERIALS	6 hours

Boutique marketing tools and promotional kit – material sourcing – bookkeeping for boutique and maintaining stock.

Unit:5	FINANCIAL MANAGEMENT	6 hours

Project finance – cash control and cash flow analysis – managing and start up the boutique business – boutique visit – boutique project report.

Course code		TECHNICAL GARMENTS	L	T	P	C
Skill Based Elective - II		Elective - IV	-	-	5	3
Pre-requisite		Basic knowledge technical garments	Syllabus Version		2023-2024	

Course Objectives:

The main objectives of this course are to:

1. To understand the fundamental requirements of garments for various technical applications
2. To impart knowledge on the functions of various technical garments
3. To acquire knowledge on advanced garment for high end applications

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

CO1	Remember high tech garments design	K1
CO2	Understand functional properties for high tech garments	K2
CO3	Understand Design the garment for different technical	K2
CO4	Understand technical end uses	K2
CO5	Analyze the types and suitability of technical garments	K

K1–Remember; **K2**–Understand; **K3**–Apply; **K4**–Analyze; **K5**–Evaluate; **K6**–Create

Unit:1	Fundamentals of Technical Garments	6 hours

Innovations in fibres - High performance fibre: organic and inorganic fibres, novelty fibres. Technical fabric system - material requirement, techniques; woven fabrics, weft and warp knitted fabrics, nonwoven fabric. Technical clothing systems - types, scope.

Unit:2	Productive Garments	6 hours

Design features, clothing in hot environments - radiation protective clothing. Cold climate clothing - Personal protective devices, clothing for foul weather conditions, snow clothing. Water vapour permeable/waterproof clothing. Military protective clothing - armour guard, biological and chemical warfare protection

Unit:3	Sportswear	6 hours

Sportswear applications - fundamental requirements and qualities. Material requirement, design features, production techniques, clothing fitness, functionality, level of breathability, moisture/vapour transfer, heat insulation, wind-proofing, water-proofing, sport and environment requirements.

Unit:4	Hazard Environment Clothing	6 hours

Hazard identification - Garment requirement and its suitability, material requirement, design features, production techniques, clothing fitness, functionality - thermal / explosive, contact with hot/cold objects / parts, electrical, noise and vibration, environmental, chemicals / substances, radiation, biological, flame and fire-retardant garments.

Unit:5	Designing and Manufacturing	6 hours

Work environment, clothing and worker training, assessment of risk for workers. Work wear - material requirement, design features, production techniques, clothing fitness, functionality, types and structures. Safety and health protection, personal protective equipment. Modern era on work wear - fashion inspiration

SECOND YEAR	NON MAJOR ELECTIVE – I (NME)	CREDIT: 2
SEMESTER - III	A) NUTRITION FOR EVERYDAY LIFE	25NDNM1B

COURSE OUTCOMES:

1. The students will have a basic concept on food, nutrition and health
2. This course deals with actual requirement of an individual throughout the normal lifespan

COURSE CONTENT:

UNIT I

Food- Definition, functions, basic food groups. Nutrition – definition, types of nutrients – carbohydrate, protein, fat, vitamins and minerals - their functions and sources, Importance of breakfast.

UNIT II

Meal planning -Basic concepts and importance of meal planning. Principles of meal planning-underlying factors which should be considered before planning meals, use of weights and measures.

UNIT III

Concept of a balanced diet: Food Pyramid, Food and Culture; Food Hypersensitivity: Food allergy (nuts and seafood) and Food intolerance (lactose and gluten).Routine hospital diet-clear fluid diet, full fluid diet, soft diet.

UNIT IV

Anthropometric assessment – height, weight, body mass index, head circumference, Mid-arm circumference, skinfold thickness, ideal body weight and clinical assessment, dietary recall method.

UNIT V

Malnutrition- Symptoms causes and preventive measures of Protein energy malnutrition, Vitamin A deficiency, Anemia, Obesity and underweight. Dietary management of degenerative diseases – Diabetes mellitus, Hypertension, Cardio vascular diseases.
